

DRUGS IN RESEARCH

Drugs in Research is available **exclusively** to our members via **password access only** at our web-site (www.clinicalinvestigators.com). It offers information about new drugs in development; including the **sponsor** and **phase** of the trial. The current version is available at our web-site and contains information about drugs currently in the FDA Pipeline!!!!

This report is organized by **Major Organ System**; within each system, the information is arranged by specific therapeutic areas. **Here is an abridged excerpt....**

CARDIOVASCULAR SYSTEM

ACUTE CORONARY SYNDROME (PEDIATRIC)

*Cerenis Therapeutics-CER-001, Phase II

ACUTE ISCHEMIC STROKE

*Celgene Cellular Therapeutics -PDA-001 (cenplacel-L), Phase II
*Genentech-Activase alteplase, Phase III

ANEMIA IN HEART FAILURE

*Amgen-Aranesp darbepoetin alfa, Phase III

ANGINA PECTORIS

*Cardiovascular BioTherapeutics-fibroblast growth factor-1, Phase II

CONGESTIVE HEART FAILURE

*Acorda Therapeutics -GCF2 (glial growth factor 2), Phase I
*Cephalon/Mesoblast-mesenchymal stem cell therapy, Phase II

CORONARY ARTERY DISEASE

*Biocardia-coronary artery disease gene therapy, Phase II

CORONARY ARTERY RESTENOSIS

*Cook Pharmica-Resten-MP, Phase I
*Cook Pharmica-Resten-NG, Phase II

DEEP VEIN THROMBOSIS

*AGEN Biomedical-anti-fibrin mAb 3B6/22 Tc-99m, Phase II

HEART FAILURE

*GlaxoSmithKline-Syncria albiglutide, Phase II
*Juventus Therapeutics-JVS-100, Phase I
*Thergen-epicardial angiogenesis patch, Phase I

HYPERCHOLESTEROLEMIA

*Amgen-AMG 145, Phase I
*Pfizer-PF-04950615 (RN316), Phase II
*Tekmira Pharmaceuticals-TKM-ApoB, Phase I

HYPERTENSION (PEDIATRIC)

*Merck-Cozaar losartan, Phase III
*Novartis Pharmaceuticals-Tekturna aliskiren, Phase III

HYPERTRIGLYCERIDEMIA

*Isis Pharmaceuticals-ISIS-APOCIIIIRx, Phase I

INFANTILE HEMANGIOMA

*Pierre Fabre-propranolol, Phase II/III

INHIBITOR-INDUCED ANGIOEDEMA

*Dyax-Kalbitor ecallantide, Phase II

MYOCARDIAL INFARCTION

*Amorcyte/Progenitor Cell Therapy-AMR-001, Phase I
*Cytori Therapeutics-adipose stem cell therapy, Phase I
*Neuronyx-NX-CP105, Phase I
*Osiris Therapeutics-Prochymal remestemcel-L, Phase II

PERIPHERAL ARTERIAL DISEASE

*AnGes MG-bepermingene perplasmid, Phase II
*Genzyme-HIF-1 alpha gene therapy, Phase II
*MultiGene Vascular Systems-MultiGeneAngio, Phase I/II

PERIPHERAL VASCULAR DISEASE

*Roche-RG1512 (P-selectin humAb), Phase II

PREVENTION OF THROMBOSIS

*Canyon Pharmaceuticals-Iprivask desirudin, in clinical trials

PULMONARY HYPERTENSION

*MaxCyte/Northern Therapeutics-nitric oxide synthase gene therapy, Phase I

STROKE

*GlaxoSmithKline-GSK249320, Phase II
*Lundbeck Research-LU AA24493, Phase I
*SanBio-SB-623, Phase I/II

VASCULAR ACCESS FOR HEMODIALYSIS

*Proteon Therapeutics-PRT-201 (Orphan Drug), Phase II

VENOUS THROMBOEMBOLISM (PEDIATRIC)

*Bristol-Myers Squibb/Pfizer-Eliquis apixaban, in clinical trials
*EISAI-Fragmin dalteparin, Phase II

Membership in the **CLINICAL INVESTIGATORS DIRECTORY & web-site** gives more than **400** sponsors of funded clinical research a direct link to your research capabilities... **Drugs in Research** gives **YOU** the ability to contact sponsors directly about participating in a study that falls within your interest area!!!
